

AAK SERVICE

WE ARE DIFFERENT

OUR COMPANY

AAK SERVICE is a world leading company specialised in the industrial field with a particular interest in the construction of drying & cooking systems.

We are praised for an excellent service to our customers and exported our industrial systems -in particular in the brick sector- throughout the world thanks to our seriousness and reliability in design, construction and installation of products which are characterized by the highest quality.

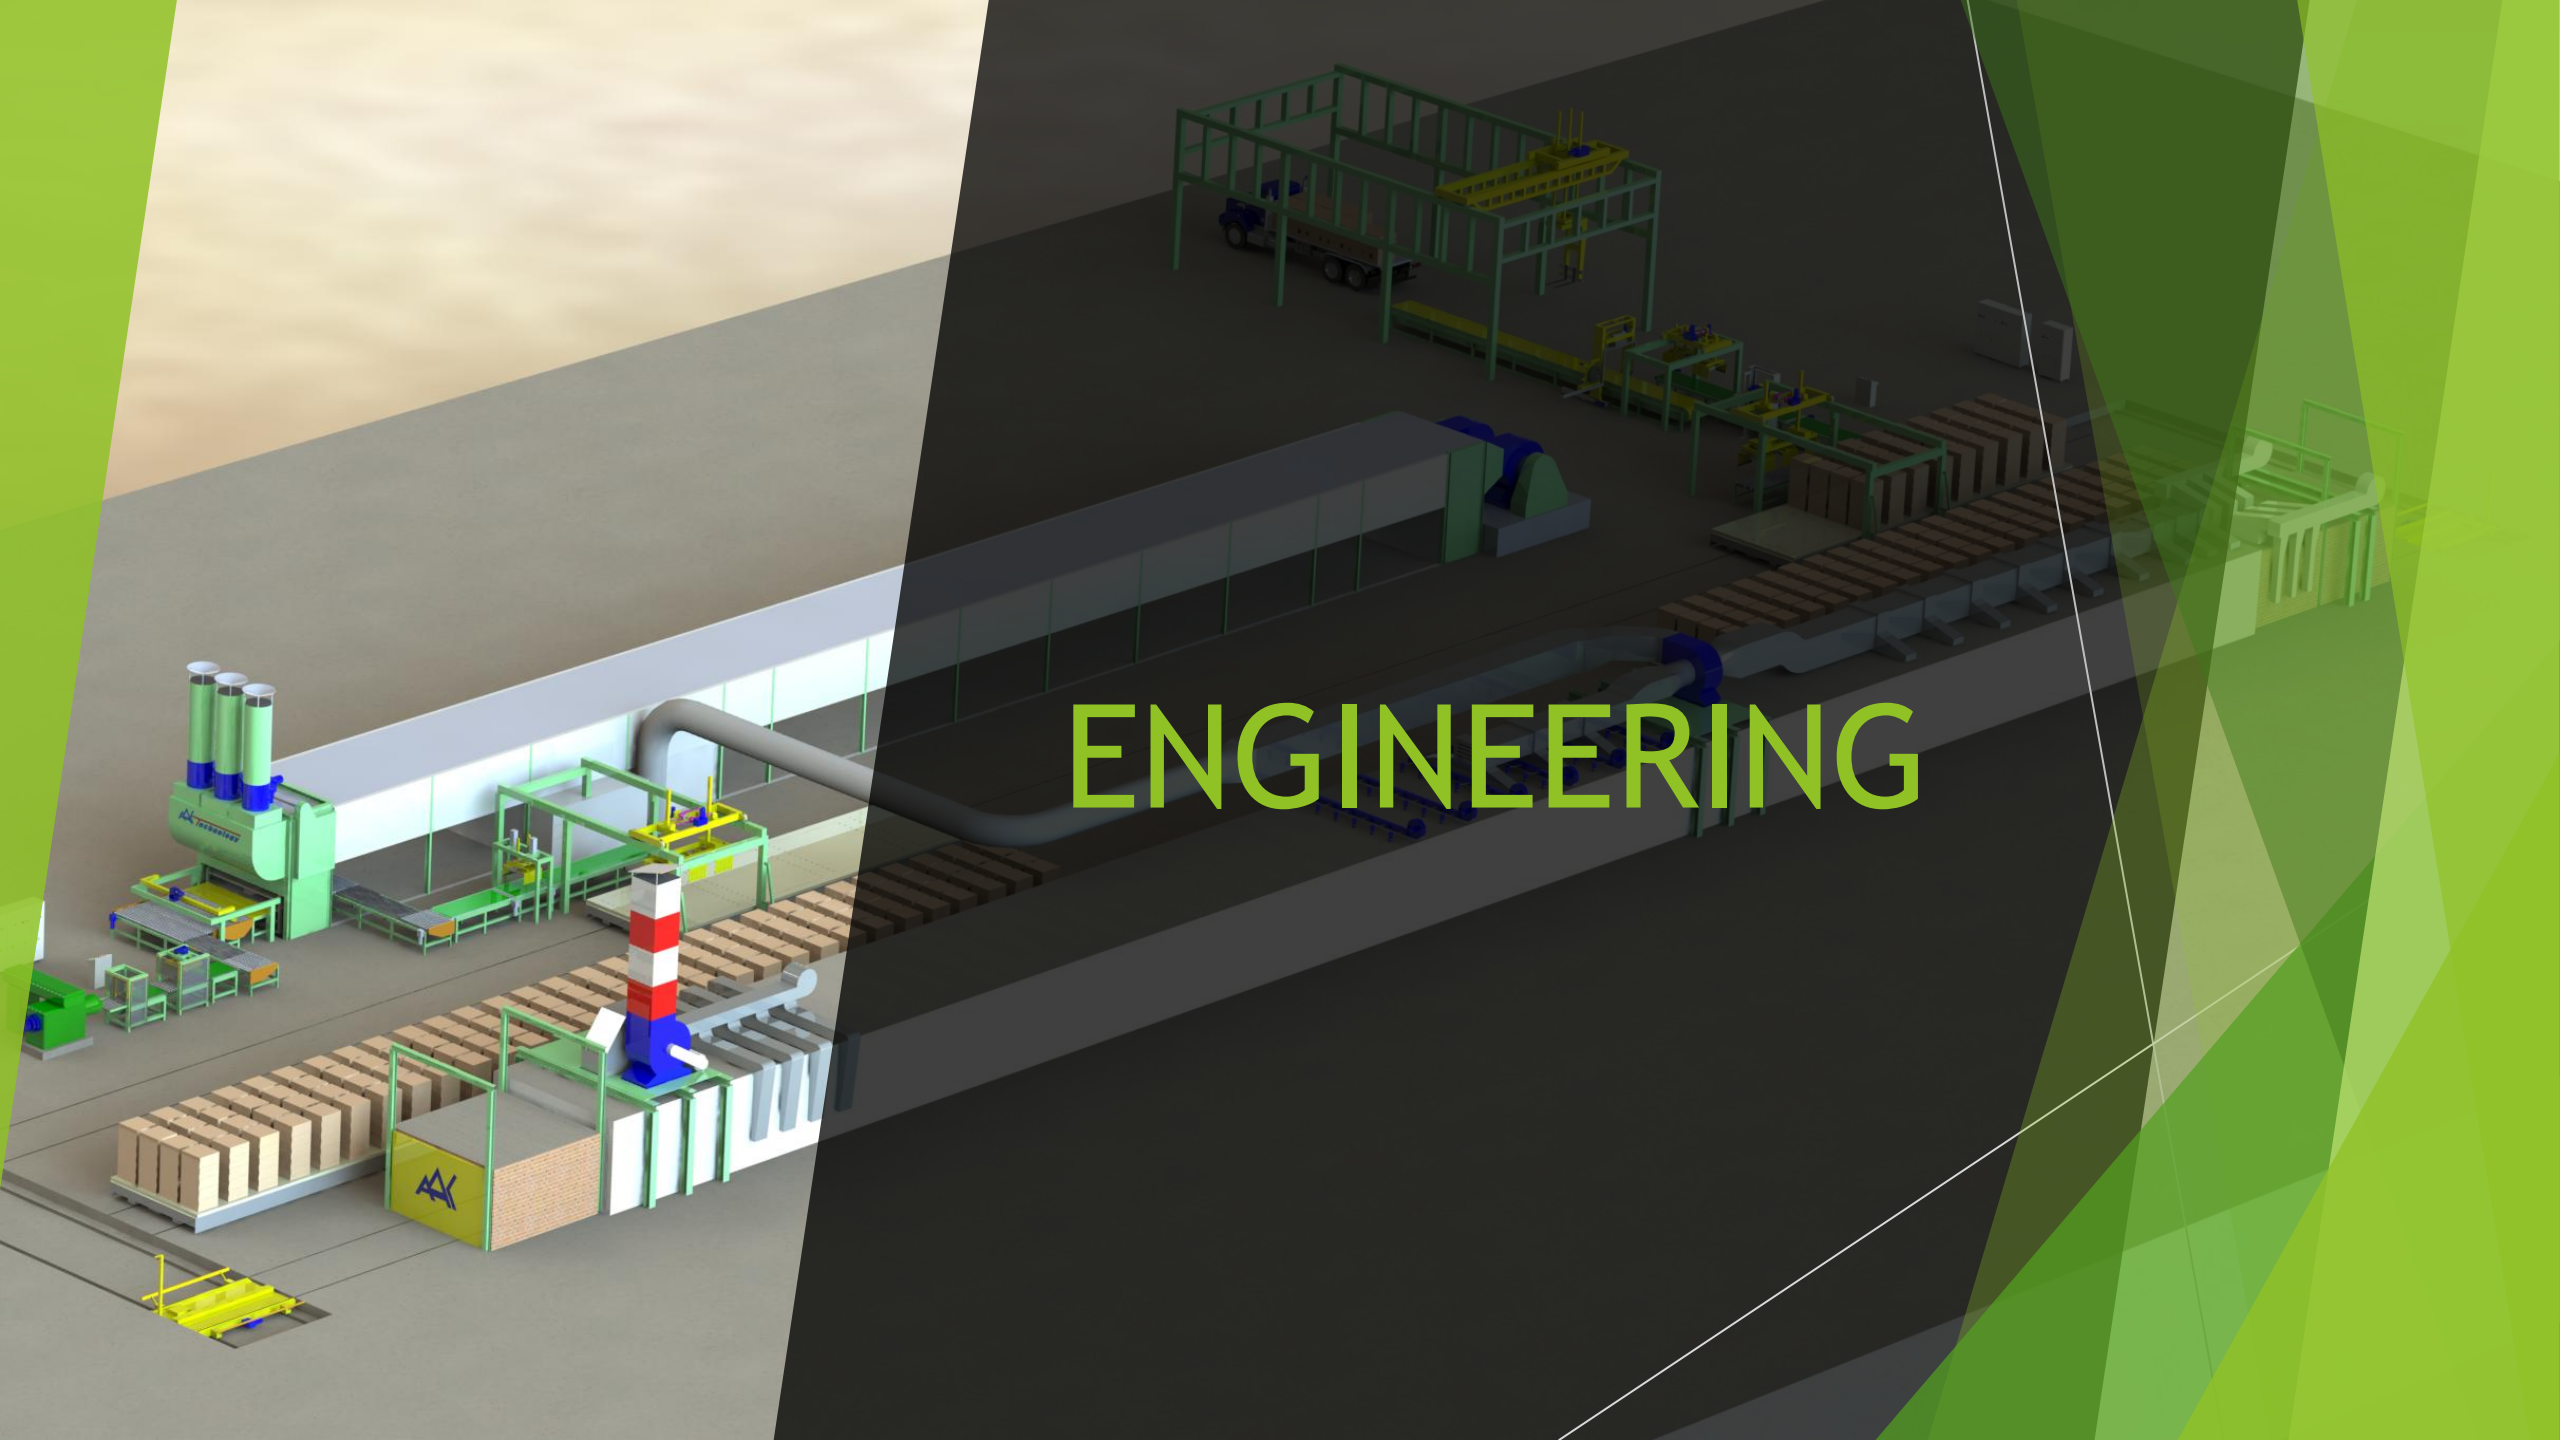

AAK was born more than 20 years ago and we work with collaborators with over 40 years of proven experience in the field.

Our strength derives from the ongoing research and development of the technology of our products; besides, the designing and construction phases are all completed internally within our factory.

Recently we also developed a brand new challenge: giving a look at the environment and the emission of Co₂, we decided to start conceiving all our machines with cutting-edge systems to reduce everything that can be harmful to the atmosphere.

We reduce fuel consumption, especially unburned fuels, using the highest quality materials in the construction, decreasing replacement costs and make the machine robust to last over time.

A 3D architectural rendering of a large industrial facility, possibly a paper mill or a chemical processing plant. The scene includes a long, low building with a grey roof, a tall red and white striped smokestack, and various conveyor systems and machinery. In the foreground, there are stacks of brown boxes or pallets. The background shows a hazy sky. The entire image is framed by green geometric shapes on the left and right sides. The word "ENGINEERING" is written in large, bold, green capital letters across the center of the image.

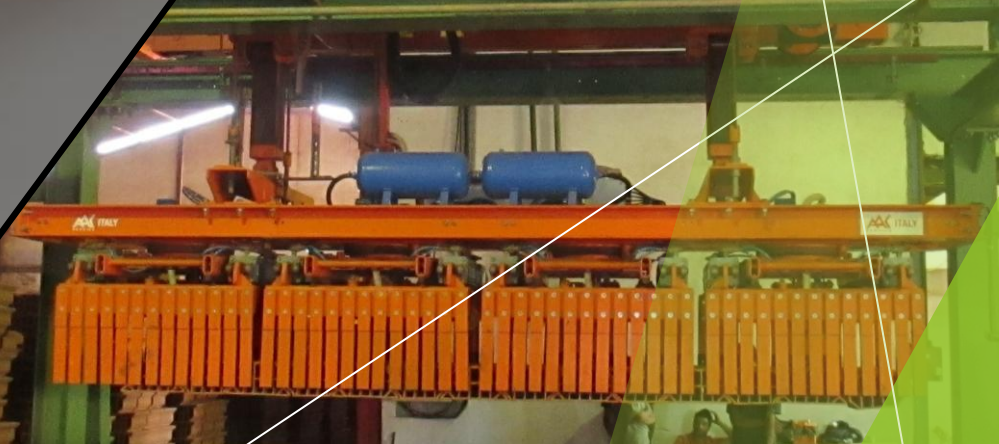

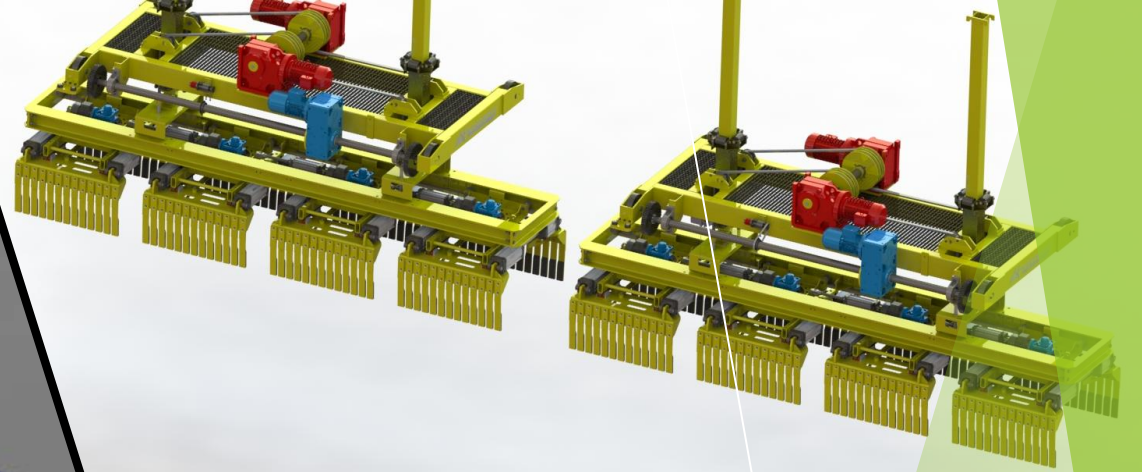

ENGINEERING

OUR PRODUCTS

- ▶ CUTTING UNIT
- ▶ DRYER BURNERS
- ▶ DRYER LOADING
- ▶ PROGRAMMING UNIT
- ▶ AUTOMATIC SETTING MACHINE
- ▶ KILN CAR HANDLING
- ▶ FIRING INSTALLATIONS
- ▶ UNLOADING SYSTEMS
- ▶ AUTOMATIC PACKING LINE
- ▶ TRUCK LOADING
- ▶ SPARE PARTS

OUR INSTALLATIONS

DESIGN

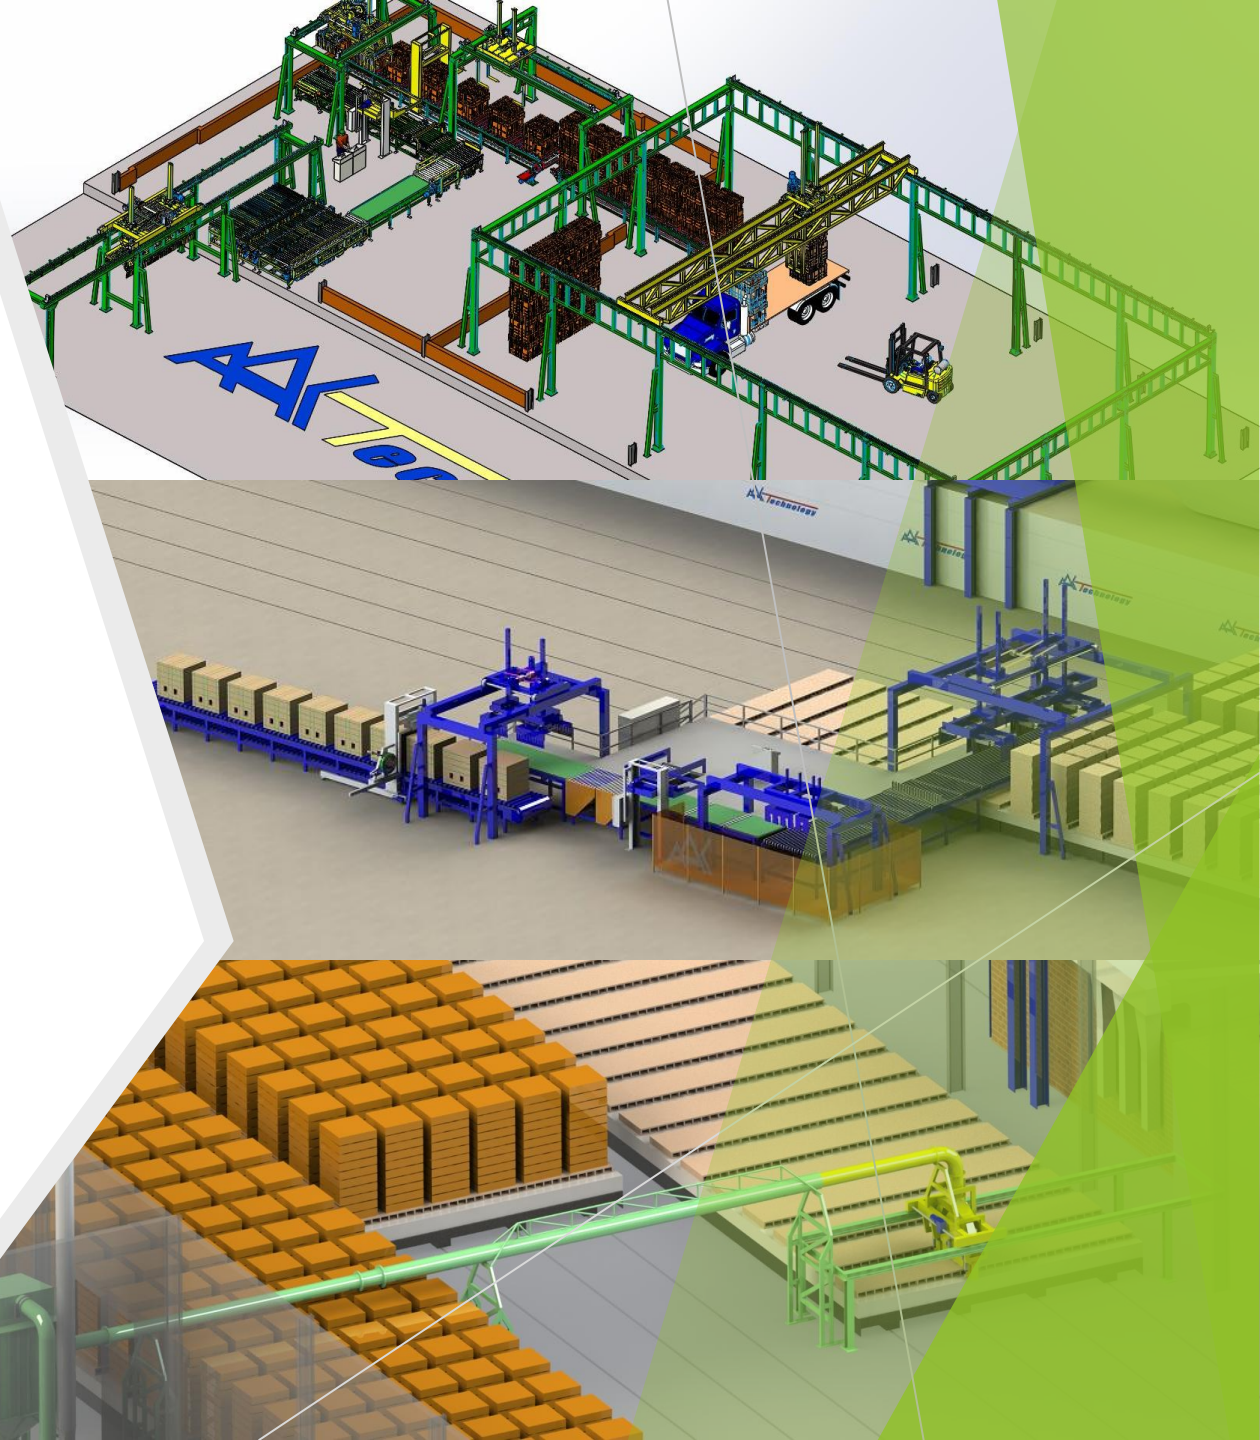

PROJECT

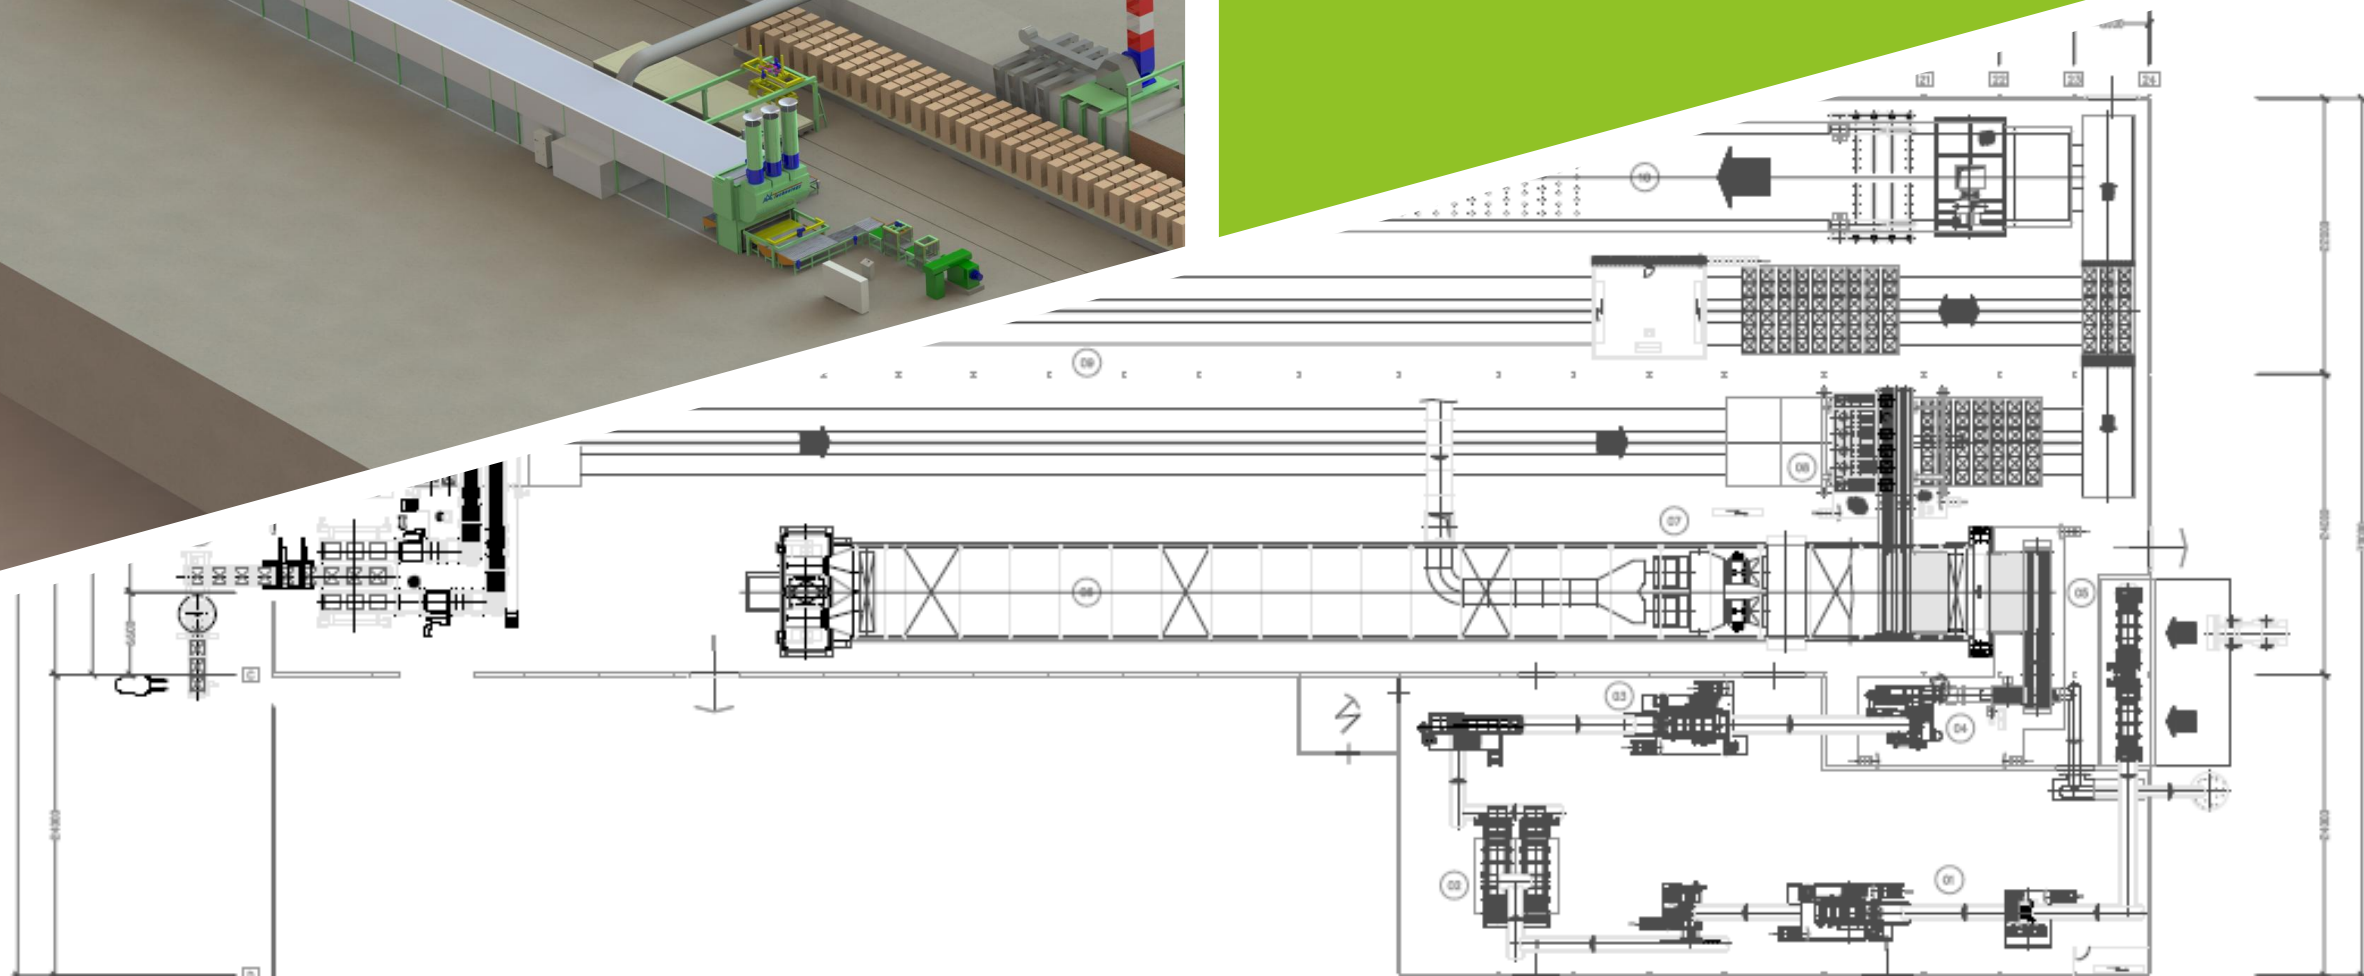

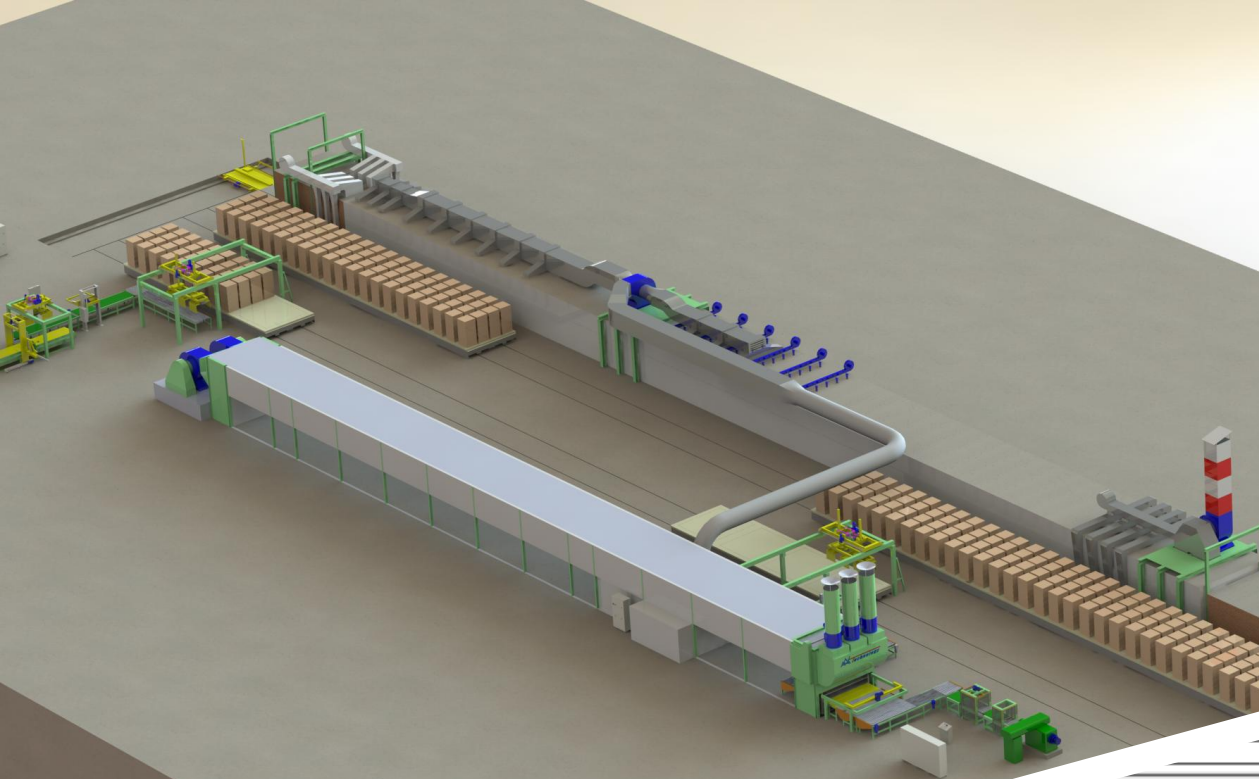

EXECUTION

Thanks to the constant attention to innovative technologies, AAK SERVICE has achieved an excellent level of expertise in the field of industrial automation.

A team of competent designers and technicians allows us to solve all the problems that arise before, during and after the realization of the project, ensuring a competent after-sales service (technical assistance and spare parts providing) as well.

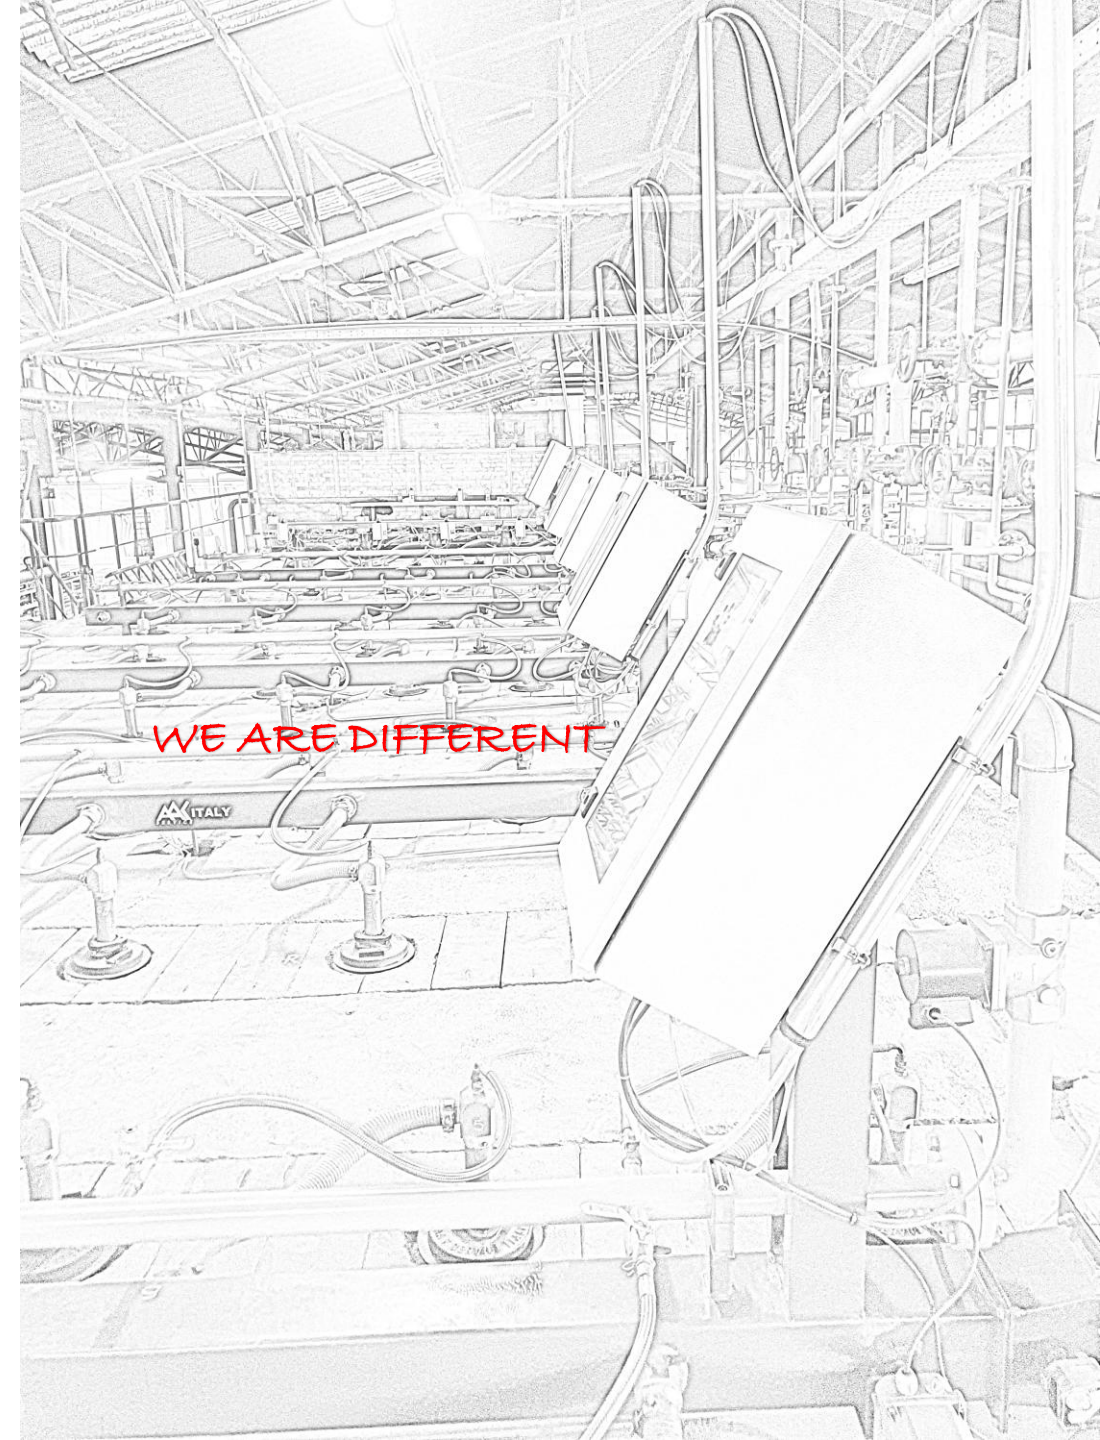

Industrial automation for product handling is one of our strengths, because we have consolidated a great experience in this sector, thanks to the creation of numerous solutions for construction material production plants all over the world: fully automatic or semi-automatic plants also with the use of robotic arms.

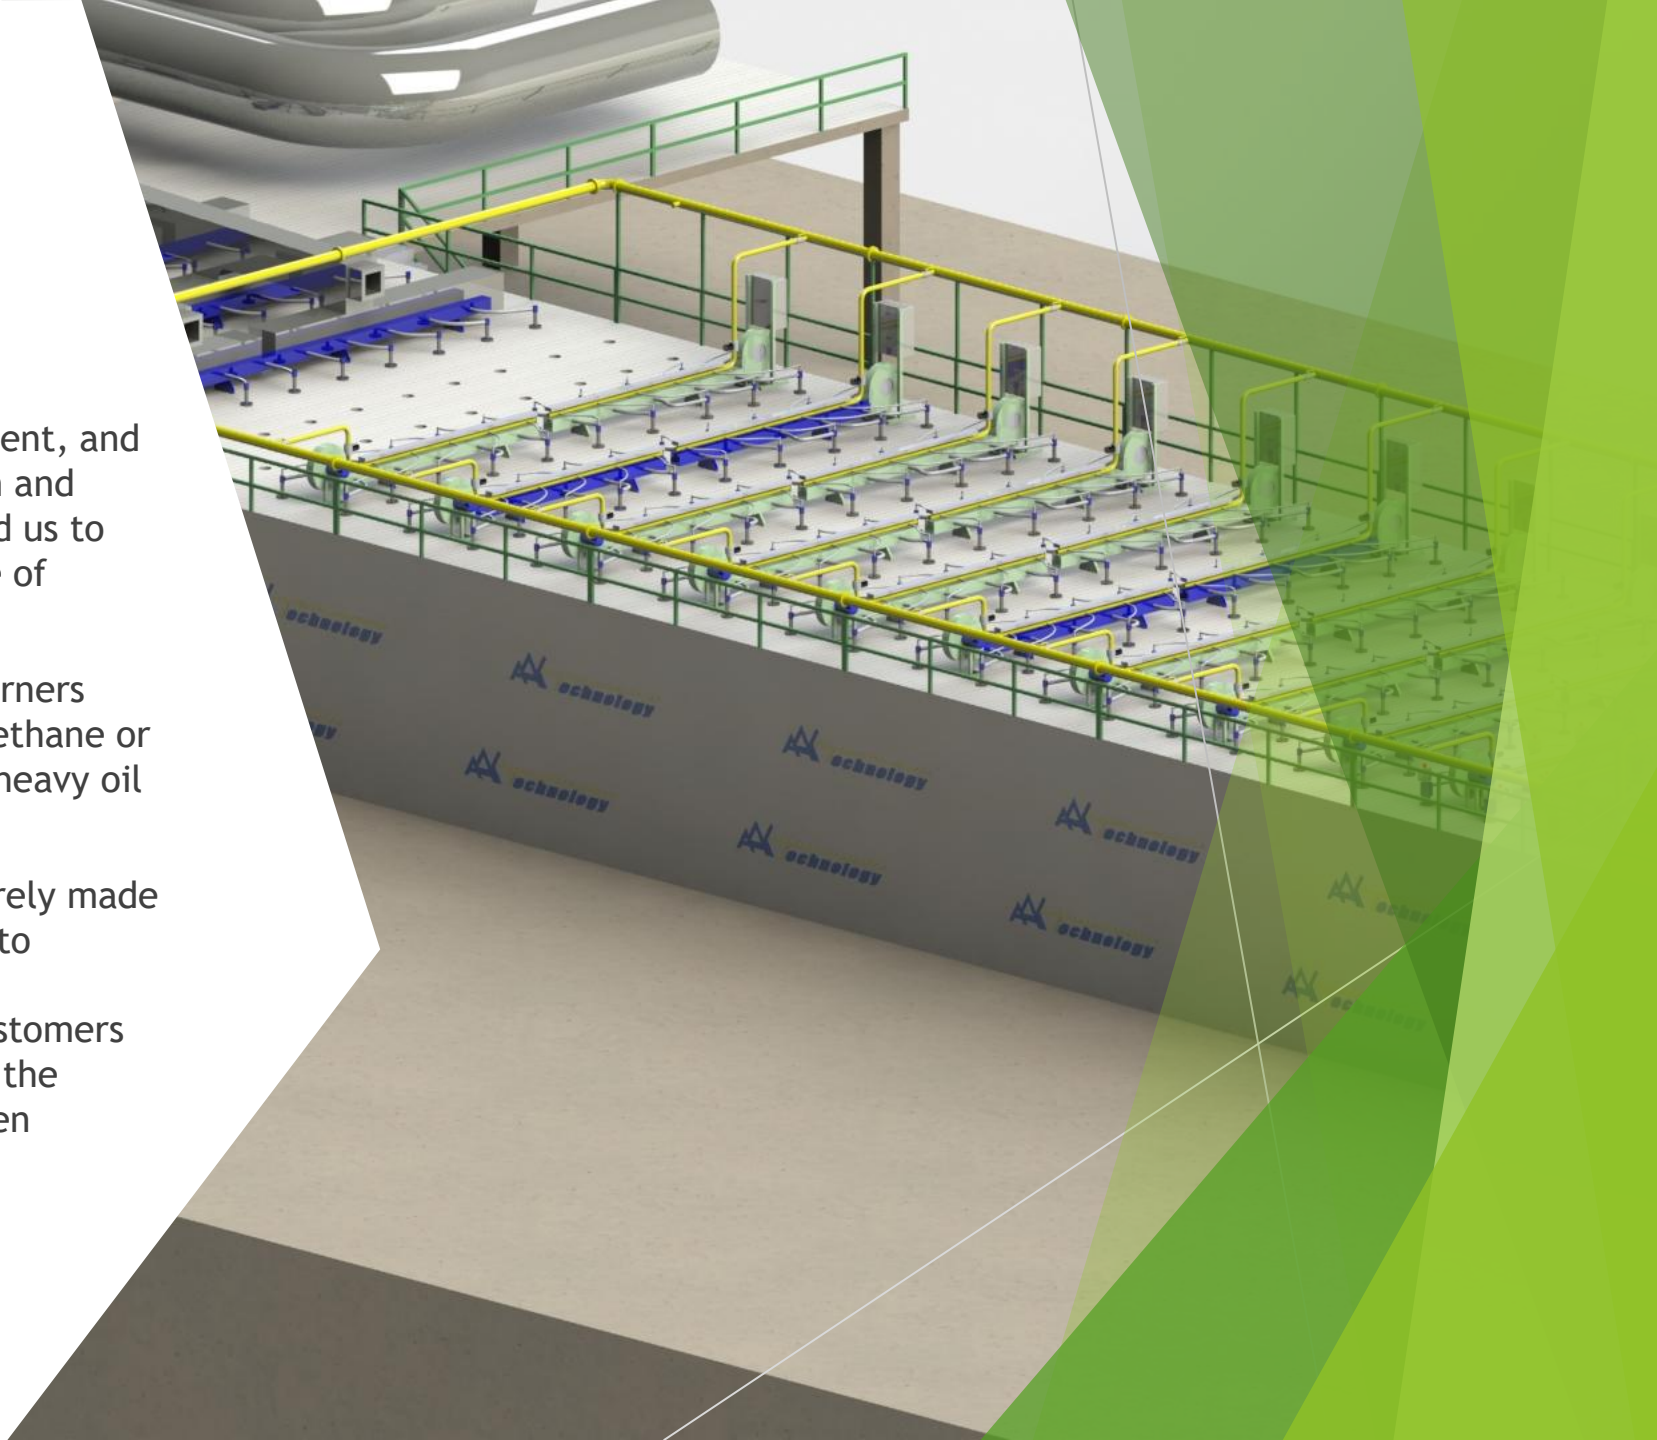

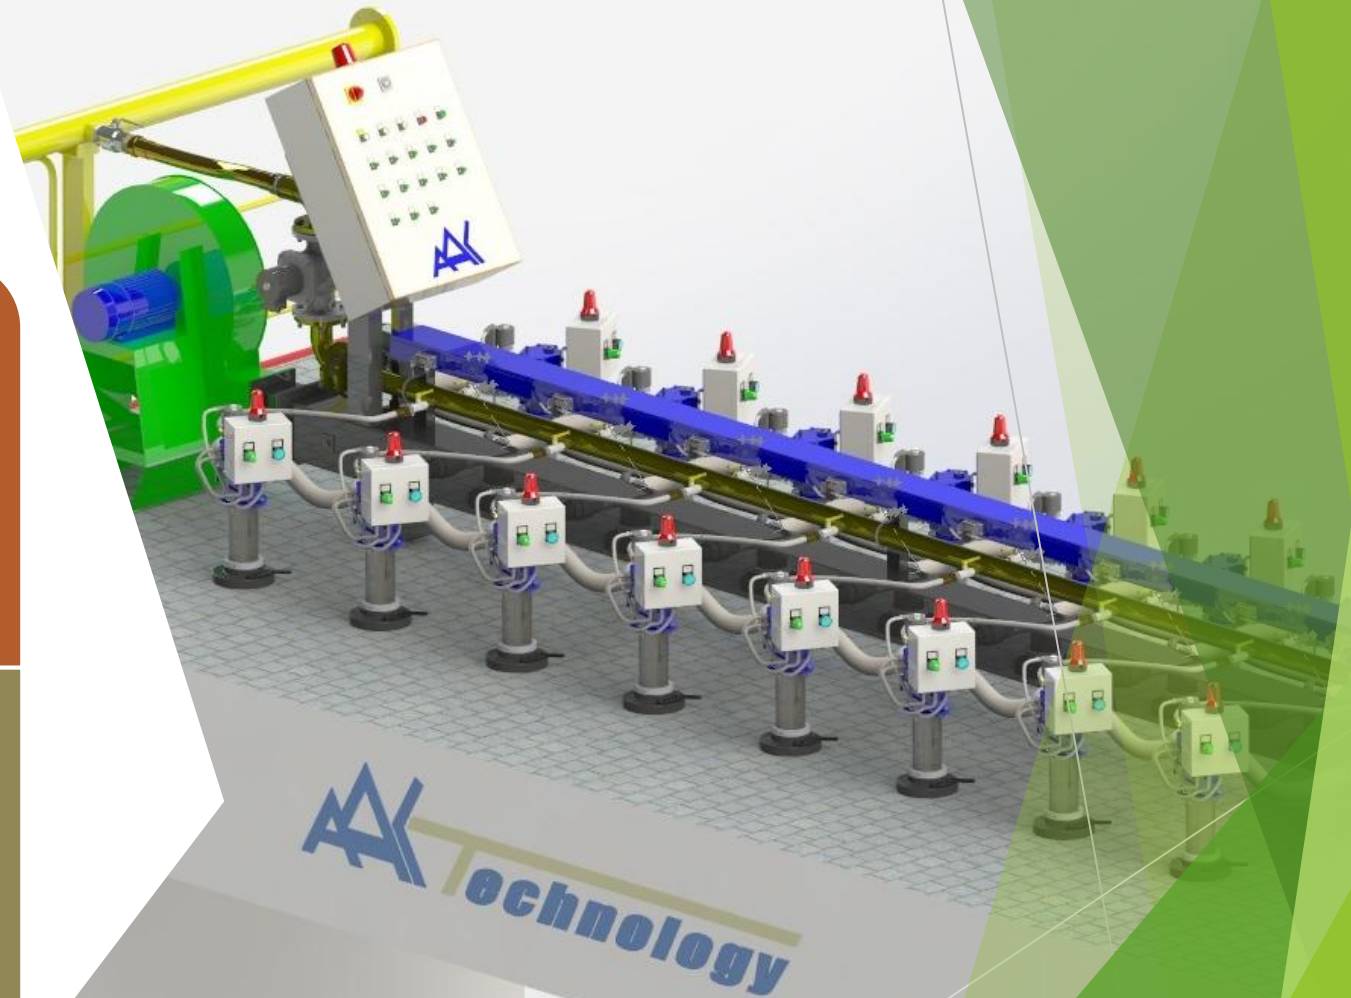

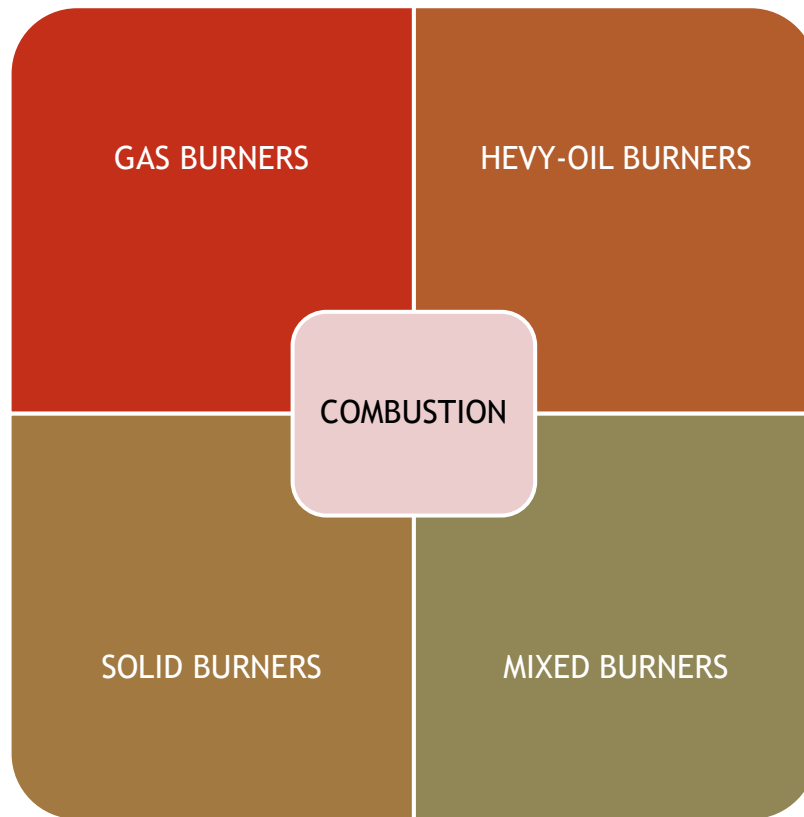

DRYING COOKING LINE

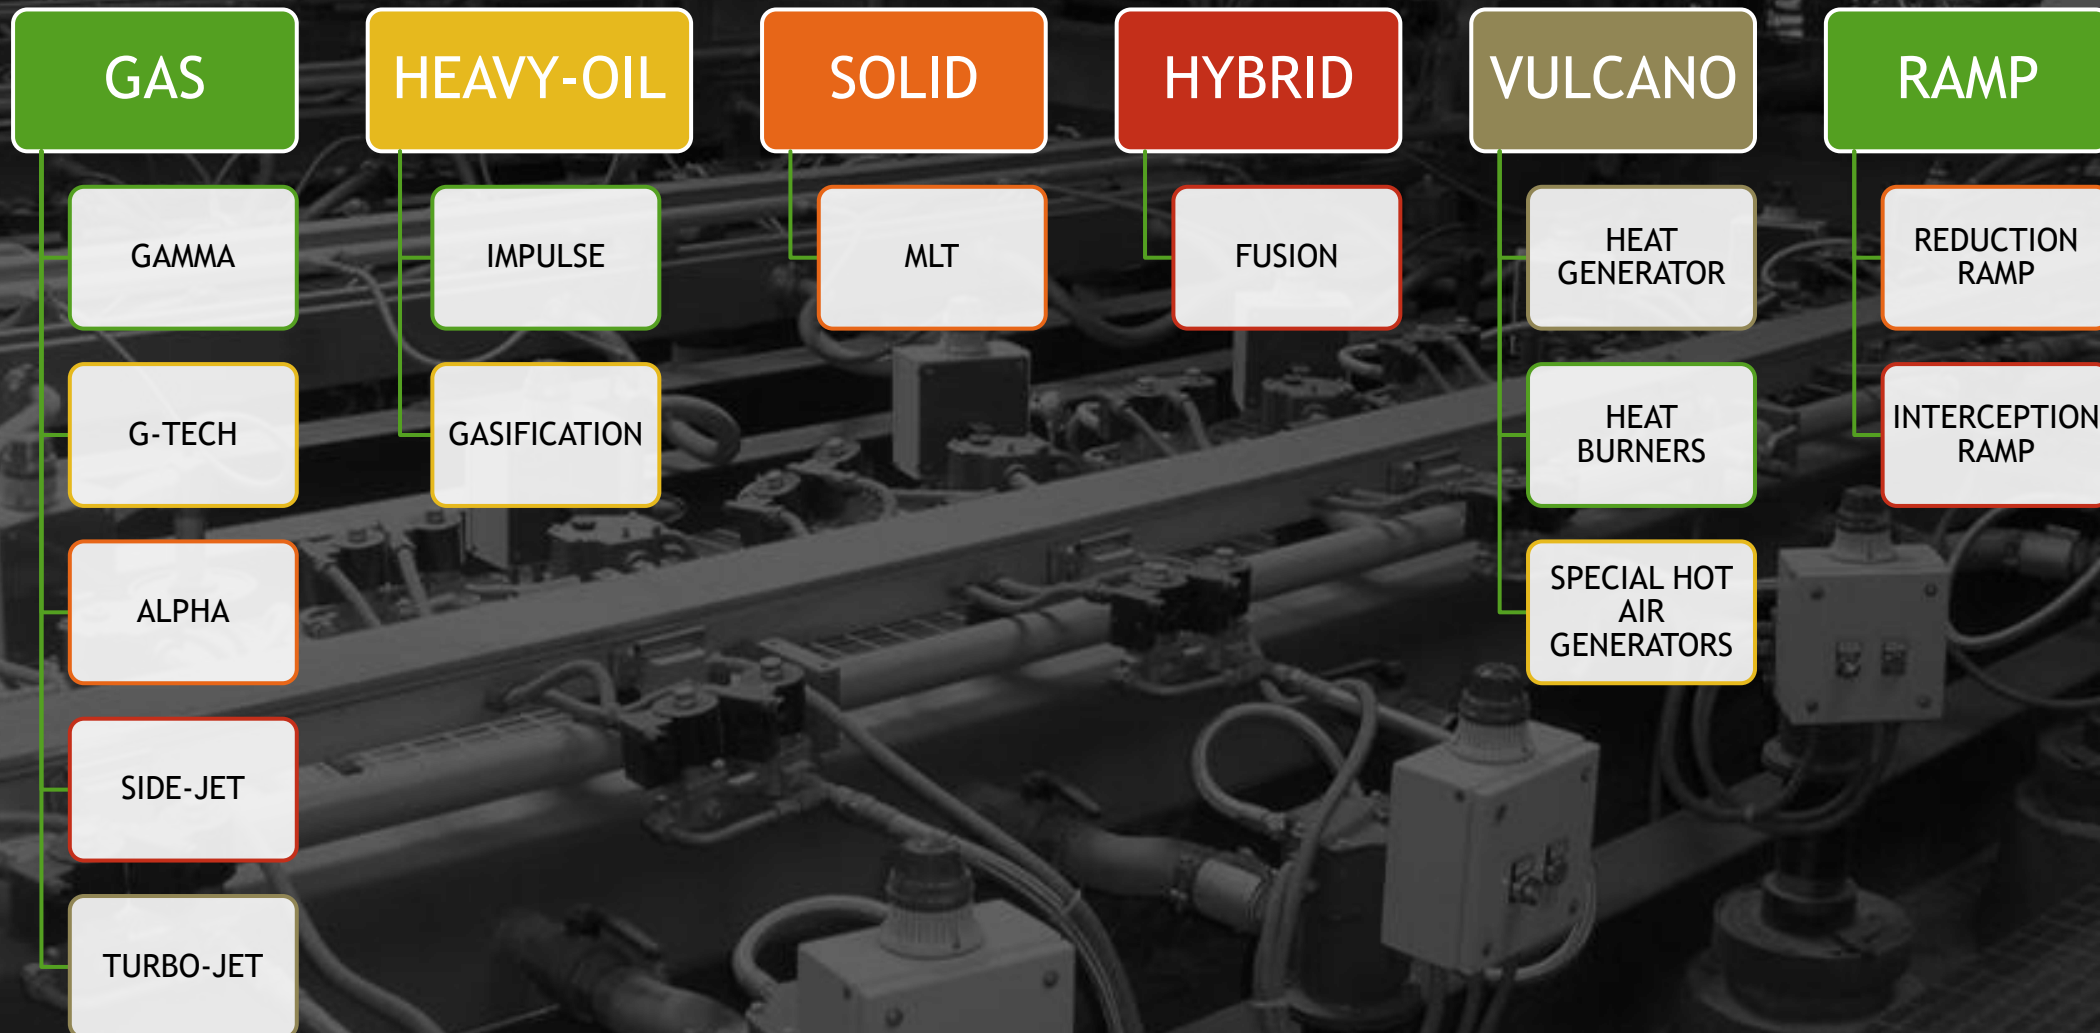

OUR MISSION

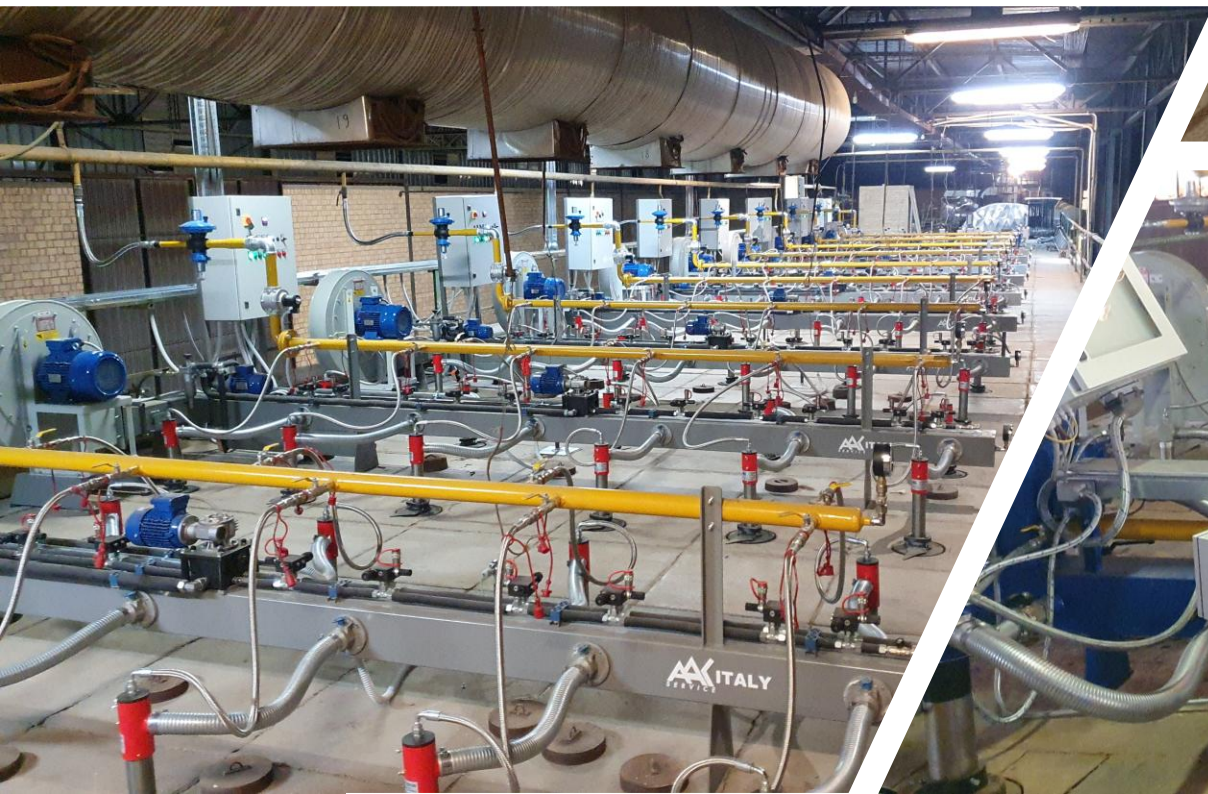

- ▶ Continuous research and development, and the experience gained in installation and design all over the world has allowed us to become a leader in the manufacture of burners for all industrial sectors.
- ▶ Our range does not only include burners powered by gaseous fuels such as methane or LPG: we can also supply solid fuel - heavy oil - light oil machines.
- ▶ The entire range of burners is entirely made within our factory, from conception to design, manufacturing, testing. This represents an added value as our customers can visit us at any time to follow all the production phases of their plant, even without prior notice.

OUR PRODUCTS

VULCANO

100 K-10 M KCAL

► VULCANO are gas heating production systems designed to operate within an air flow and are made up of modular structures that, depending on the power and the application required, allow the system to be used in any type of plant. The large adjustment ratio, i.e. the possibility of varying the thermal output from 1 to 20 times, ensures rapid intervention, precision of work, limited heat dispersion, reduction of emissions and therefore high thermal efficiency, high yield and lower consumption. There are many applications for this product, ranging from the ceramic and brick industry to the following sectors: food, textile, chemical, paper, etc.

WHERE TO FIND US

AAK SERVICE S.r.l.

Via A. Moro n. 2
